

Cargill Expansion of Repertoire

L.V. Lomas is pleased to announce a further expansion on our already extensive relationship with Cargill. We have entered into an agreement to distribute Cargill's line of cultures, enzymes and specialty products for the dairy and cheese production industries. This expansion will involve the installation of freezing and refrigeration capabilities at one of our facilities, 75 Summerlea. L.V. Lomas is very excited at the news of this development and looks forward to continuing our successful relationship with Cargill.
