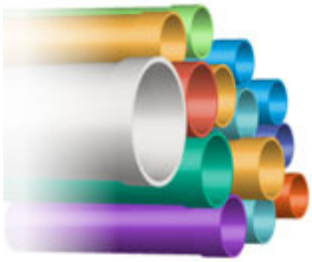
QUICK CONNECT

We have been hard at work building our plastics offering.

Our approach: source the highest quality products from North American, as well as global producers. Our result: We are able to provide unique and cost competitive solutions for your processing needs.

For the PVC industry.

We offer a full line of acrylic and MBS type impact modifiers and processing aids. Grade IM-808A can provide a higher level of impact at traditional usage rates, along with class leading whiteness. Other products include globally sourced CPVC, CPE. We also provide micro-suspension and paste PVC resins. These high quality specialty resins finds excellent applications in plastisols, wallpaper paste and also rivals solution PVC for general purpose can and coil lining applications.



Other new additions to our line.

Expanded Polystyrene, PET blow molding resins, polycarbonate and acrylic molding resin from our world class principals.

Unique products such as Denka MW1, which brings a higher measure of practical toughness for clarity polystyrene applications.

What's ahead?

L.V. Lomas is working to finalize a full range of Bioresins. Soon we will be able to offer you an alternative to traditional petroleum derived resins.

Not only does L.V. Lomas have in depth technical experience within our team, we also utilize industry experts to help our customers to get the best practical solutions.

Put us to the test. Give us a call.
